Butte, Dec. 15.—The Amalgamated Copper Company is carrying on a larger amount of development work in the Butte district than at any time in a number of years. It is stuking a new working shaft on the Kagnon mine, to take the place of the old incline shaft which is 2,300 feet deep. The home of the butte of the butte of the butte of the lowest level. The main shaft of the Jaconard mine, now 1,500 feet deep, is also sheking and deeper, and so is the Mountain Consolidated shaft of the Anaconda company for my shaft of the Jaconard mine, now 1,500 feet deep, is also sheking made deeper, and so is the Mountain Consolidated shaft of the Anaconda which has a depth of 2,335 feet, 500 feet of it having been sunk during the past year. The belianced shaft of the Anaconda company property, has reached a depth of 2,335 feet, 500 feet of it having been sunk during the past year. The belianced shaft of the Anaconda company property, has reached a depth of 1,200 and sinking is silve. It is understood that when connected with the 1,600 level of most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is connected with the 1,600 level of the most is being made a large four compartment haft, and she made a large four compartment haft, and she made a large four compartment haft, and Boston property, has been sunk

The Lincoln company is developing a large and rich gold mine a mile north of Idaho City.

UTAN.

SALT LARE, Dec. 15.—Ernest R. Woolley, president of the Pioneer Ore Sampling Company, is at the head of the Utah Ore Sampling Company, is at the head of the Utah Ore Sampling Company, which consolidated this weak all the important sampling works in the State. In the new Utah company are included the Sandy plant of the Pioneer and the Taylor & Brunton Ore Sampling Company's plants at Murray and Silver City. The new company is capitalized at \$200,000; its plants have a capacity for 500,000 tons of ore yearly. The Taylor & Brunton company retains its plants at Aspen, Col., and Miliers, Nev.

The Utah Consolidated Mining Company has opened in new territory on the lowest level of the Highland Boy mine an ore body that has been followed for 400 feet on its striks with the face of the drift still in good ore, and it has been crosscut for 80 feet. The ore is average Highland Boy grade, running 3 and 4 per cent. copper, with fair gold and silver values. Within the body high grade bunches are encountered. This ore body is to the north of everything that has been opened hitherto in the upper levels.

In October when the Chief Consolidated mine in Tintic entered upon its profit making career the net earnings were 8700. Shipments for November indicate net earnings of between \$25.000 and \$30.000. To satisfy Eastern stockholders who were misled by a publication that the mine had been shut down a more or less official report was that 175 men are employed in the mine, with 75 more on top and in the mill.

The Golden Chain Mining Company has taken complete charge of the Ajax workings which it recently purchased for \$50.000. Drifting for the Golden Chain which is 1,100 feet deep.

the Mary Count wints in the Gold Road clarged, which are suprised printing of the County of the Coun

of more than 276 a ton.

Ore shipments from the Denn mine to the Copper Queen smelter at Dougias have been temporarily discontinued.

The Southern Belle mine in the Santa at Catalina Mountains, which was owned by the estate of the late Col, James W. Fellows, has been sold to a syndicate of California men for \$40,000. This mine was a good producer in early days but has been idle for several users.

A. L. White of Lime, Ohio, and associates have bonded the Pinkham mine in the Chloride district and are negotiating for other properties. The Pinkham is owned by John Boyle, Jr., manager of the Golconda mine. Mr. White and associates also own the Midnight mine. which was recently unwatered and drifting resumed on the 200 foot level.

The May Count mine in the Gold Road district, which was purchased recently by A. C. Worden & Co., is developing into a good producer. A 3 foot vein of ore running \$22 a ton has been encountered at a depth of 80 feet.

A strike of ore running as high as \$600 a ton was recently made in the Bimetal mine in the Kingman district. Mill tests of the ore are being made for John Hays Hammond.
